Yet Another QuickBooks Feature :)

Hi there,

Welcome to our newsletter about Nexonia's great Intuit QuickBooks integration. We've been integrating with QuickBooks longer than any other accounting system, and we keep adding and enhancing all time time.

We look forward to hearing from you!

Neil

NEW FOR OCTOBER 2013

- **QuickBooks API V3:** in beta, almost released, with full support for all the latest QuickBooks features (both online and desktop) that the older QuickBooks programming interfaces don't support (e.g. billable flag for QuickBooks Online expenses)
- **SmartVault:** well, technically, this will be announced at the start of November, but all our integration work is done and it works perfectly for getting your expense reports into QuickBooks Desktop and QuickBooks Online

EXISTING FOR QUICKBOOKS

- **Full integration:** Automated synchronization (add/change/edit) of vendors, customers, projects, items, classes, locations and timesheets service and payroll items
- **Deep configuration:** Not only do we have full synchronization, but we have even more refinement settings for the objects we synchronize
