

News and Updates - June 2014

Hello there,

It's summer!

If you have any interest in the updates outlined in this newsletter, or you have any other inquiries, you can reach us any time at help@nexonia.com.

You can now use your appreciation for Nexonia to make the world a better place. Every time you recommend Nexonia to your friends and they start using our solution(s), we'll donate \$50 on your behalf to either the United Way (for North America) or your local Red Cross organization.

All you need to do is to go to [this page](#) and let us know who you think would appreciate Nexonia as much as you do! It goes without saying, but we appreciate and value all our customers.

Refer Nexonia!

WEB

- **Expense Duplicate Detection:** if you turn this on, your finance teams and all administrators can see system-wide possible duplicate entries. Not only that, but you can even look at the receipt pictures for the potential duplicates and even "clear" the duplicate icon for an entry.
- **New Status Icons:** the icons are now less obtrusive and more in keeping with our streamlined web interface.
- **Project Types in Approvals:** you can now using project types as an approval process routing criteria.

- **CC Expense Multi-Date with Different Start Date:** this means for credit card charges we can now no longer assume the start date of a multi-date choice is the date of the credit card charge.
- **More Expense Attendees Options:** you can now make the person creating the expense part of the required attendees (or not).
- **Memo Requirement only on Policy Violation:** another requested expense policy option!
- **Timesheet Task Categories by Employee:** If you use timesheets and your task categories are manually managed, this can be a big productivity and time-saver!
- **Pseudo Statement-Date Option:** for small business card integrations where we don't get the statement date explicitly from the bank datafeed.

MOBILE

- Flatter UI with new icons
- Design underway for August/September release of new UI
- Lots of smaller refinements
- BlackBerry 10 update to match iOS, Android and Windows Phone UI and features

INTEGRATIONS

- **Dynamics GP:** a number of small refinements.
- **Intacct:** you can now do AP in Nexonia.
- **NetSuite:** many small refinements.
- **Xero:** we now support Nexonia granular VAT taxes, in addition to Xero taxes, for even better support for our Xero customers.
- **Credit Cards:** we've added a second personal and small business datasource, so now we have the two main datasources for personal and small business. We've always done corporate credit cards!
- **QuickBooks:** many small refinements.

COMING SOON

- Receipt Data in July Nexonia
- OCR in July
- Multi-destination Mileage in July

- and much, much more!
